

## **WKA Karting Track days Covid-19 Update:**

With all of the social impacts being felt from the Covid-19 situation, we're understandably getting lots of questions regarding our upcoming **2021** MPH WKA Karting track days event. Our plan for the event at this point is to proceed as planned, with a few modifications to the administration of the event for reasonable accommodation of the social-distancing guidelines advised by the CDC. Keeping in mind that our events are outdoor individual sporting events, we do not have the same level of risk that some other team or indoor sporting events may have. The guidelines below are our **CURRENT** plan based upon the **CURRENT** situation with regard to the Covid-19 guidelines, and Adams County DHM in place if we need to revise the plan later, we will.

### **REGISTRATION:**

We will "NOT" be accepting registration at the track for this event. You must register online and answer the COVID-19 questions to participate.

### **Afternoon CHECK-IN:**

We will have NO LINE at check in, and practice social distancing in mind while you're at MPH. You'll sign the WKA Waiver sheet, and receive your WKA wristband. Cash, checks and Credit cards (+ 4% on CC) are accepted in those cases that require payment.

### **DRIVER'S MEETING:**

Staff will post all drivers on any changes or how the on-track event will proceed for the day prior to on track activities. Socially distancing driver meeting.

## **GROUP GATHERINGS:**

There will be no large group gatherings, no driver's meeting, no group lunch. This is THE BIG factor for us deciding to still hold WKA events, large group gatherings over 10 people are what the CDC guidelines specify as a risk, so we will not have any. The paddock is large and spread out, please set up your pit area where you can maintain distance from others, and when gathering in groups please make sure the group size is under 10. We're all adults, and can make what we feel are the best decisions for our own health and safety, while maintaining our freedom to engage in the sport we love.

## **PERSONAL BEHAVIOR:**

We kindly request if you are feeling any symptoms consistent with a viral respiratory infection (coughing, sneezing, shortness of breath, fever, chills, aches, etc.) PLEASE DO NOT come to the event. If you have had contact with a known carrier of the Covid-19 virus, and are within 14 days of this contact and have not tested negative for the virus yourself, please also DO NOT come to the event. At the event itself, please practice prudent social distancing, avoid skin-to-skin contact with anyone, if you feel a cough coming on please distance yourself from others and cough into your arm and not your hands, etc. Please wash your hands regularly. The MPH staff will ensure that the common restroom and shower facilities are cleaned and disinfected regularly while you are there.

## **OTHER FACTORS:**

Regardless of the other aspects of this, we STILL need to have lots of driver's confirmed for the event in order to hold it. Obviously the national and state-level response to this situation is fluid, if things do change in a way that requires us to modify the plan, we'll certainly let everyone know, but for now we're a GO!

Thank you all for your support of Motorsports Park Hastings!
